Salma Harchafi

Continuing Airworthiness Engineer (apprentice), Fleet Manager at Airbus · Industrial Engineering student, Supply Chain & Digital

+33 6 65 32 14 47 · salmaharchafi3@gmail.com · linkedin.com/in/salma-harchafi-056602276
22 years old · Moroccan · Based in France (Paris / Toulouse) · Open to relocation
Available for an international internship, March to September 2027 (1 to 3 months or longer)

PROFILE

Third-year apprentice engineer at Airbus and final-year Industrial Engineering student at ESIEE Paris. As Fleet Manager in the CAMO, I follow aircraft projects to keep them airworthy and I build the tools my team works with. I want to learn from a new team abroad and bring what I know: process maps, tracking tools and dashboards.

PROFESSIONAL EXPERIENCE

Airbus, Toulouse, France — Sep 2024 – Present (3rd year)
Apprentice Continuing Airworthiness Engineer, Fleet Manager · CAMO, international team (France, India, Malaysia)

- Fleet Manager on aircraft projects, from CAMO induction and Permit to Fly to the airworthiness review (ARC), with Technical Records, the AD Manager and the Part-145 maintenance organisation.
- SMS: set up the dashboard that tracks safety cases and KPIs.
- CAME / Part-CAMO: mapped the procedures along the project flow, role by role.
- A320 cabin modification on site: modification kits, BFE and release certificates (EASA Form 1).
- Airworthiness Directives and Service Bulletins: follow-up on projects; supply chain tracker for urgent parts.
- Technical records: archiving and migration of aircraft files for EASA audits; tested the archiving tool before its rollout.
- Planning tool for CAMO projects (Gantt, fleet view, workload plan).

McDonald's, France · **Crew Member, promoted to Crew Trainer** — 2022 – 2024

- Promoted on performance to train new crew members on service standards and food safety, while studying full time.

Retail inventory missions, France · **Inventory Operator** — Student jobs

- Carried out stock counts in retail stores and reconciled them with system records.

EDUCATION

ESIEE Paris, Université Gustave Eiffel, Paris, France — 2024 – 2027 (expected)
Engineering degree (Diplôme d'Ingénieur, Master's level), Industrial Engineering: Supply Chain & Digital

- Three-year work-study track with Airbus. Operations research and scheduling, industrial maintenance and reliability, discrete-event simulation (ARENA), information systems, Industry 4.0.

Université de Toulouse (formerly Toulouse III – Paul Sabatier), Toulouse, France — 2021 – 2024
Bachelor's programme (Licence), Mechanical & Aeronautical Engineering, three years of study

Baccalauréat, Physical Sciences, Morocco · **Highest honours (mention Très Bien)** — 2021

ACADEMIC PROJECTS

- **Airport operations web app** (team project): PHP/MySQL application simulating an airport operations tool, deployed online.
- **Battery life prediction** (team project): neural network in MATLAB to predict lithium-ion battery life; led the dataset analysis.
- **Production scheduling**: scheduling problems modelled and solved in Python (OR-Tools).

SKILLS

Airworthiness: Part-CAMO / Part-M, CAME procedures, Part-145 / MRO coordination, Airworthiness Directives, Service Bulletins, EASA Form 1, BFE, Permit to Fly, ARC, technical records, SMS
Supply chain & operations: Process mapping, KPIs and dashboards, parts and supply tracking, project planning (Gantt), scheduling, reliability and maintenance, simulation
Digital tools: Excel (advanced, VBA), Google Sheets, Python, HTML / CSS / JavaScript, PHP / MySQL, MATLAB, ARENA, LaTeX
Training: Airbus internal training courses in logistics and aircraft maintenance

LANGUAGES & INTERESTS

Languages: Arabic (native) · French (fluent) · English (B2, TOEIC; daily working language at Airbus) · Spanish (beginner)
Interests: Piano and music · Fitness
